TARIFF FORMAT

- A. Page Numbering - Page numbers appear in the upper right corner of the page. Pages are numbered sequentially. However, new pages are occasionally added to the tariff. When a new page is added between pages already in effect, a decimal is added. For example, a new page added between pages 4 and 5 would be 4.1.
- B. Page Revision Numbers - Revision numbers also appear in the upper right corner of each page. These numbers are used to determine the most current page version on file with the Commission. For example, the 4th revised Page 4 cancels the 3rd revised Page 4.
- C. Paragraph Numbering Sequence - There are five levels of paragraph coding. Each level of coding is subservient to its next higher level:
- 2
 - 2.1
 - 2.1.1
 - 2.1.1.(A)
 - 2.1.1.(A).1
 - 2.1.1.(A).1.(a).
 - 2.1.1.(A).1.(a).I.
 - 2.1.1.(A).1.(a).I.(i).
 - 2.1.1.(A).1.(a).I.(i).(1).
- D. Check Sheets - When a tariff filing is made with the Commission, an updated check sheet accompanies the tariff filing. The check sheet lists the pages contained in the tariff, with a cross-reference to the current revision number. When new pages are added, the check sheet is changed to reflect the revision. All revision made in a given filing are designated by an (*). There will be no other symbols used on this sheet if these are the only changes made to it (i.e., the format, etc., remains the same just revised notation levels on some sheets). The tariff user should refer to the latest check sheet to find out if a particular sheet is the most current sheet on file with the Commission.

GENERAL DESCRIPTION OF TARIFF AND TERRITORY SERVED

This tariff contains the description of the services offered, the terms and conditions under which each of the services are provided and all effective rates and charges applicable to the furnishing of interexchange telecommunications services and operator services of ATN, Inc. d/b/a Amtel, to inmates of prisons, jails or other confinement institutions within the state of Alabama. Only those services, terms and conditions and rates and charges approved by the Alabama Public Service Commission and contained in this tariff may be provided to Customers within the State. Filed tariffs are binding on the Company and no deviation of any kind from the filed tariff is permitted.

The services offered by the Company subject to this tariff consist of furnishing Collect, Person to Person Collect Calls, Prepaid Collect Calls, and Debit Card Calls through store and forward technology incorporating an automated operator and the resale of transmission services of other carriers.

Because the services offered hereunder are provided to inmates of a correctional facility or similar institution, special stipulations may apply. These stipulations are designed to preserve the integrity and security of the facility, the safety of the public and to reduce fraud and harassment. When deemed appropriate by the facility administration, these include: providing outward only calls; providing 0+ Collect Calls only for local, intraLATA toll and interLATA toll calls and blocking access to all other types or forms of calls; blocking access to local Directory Assistance (411), long distance Directory Assistance (555-1212), 911 calls, toll free numbers including 1-800, 700, 900, 950, 10XXX and any other telephone numbers the facility administration directs; limiting hours during which telephone service is available to inmates; and/or limiting call duration to a time interval established by the facility administration.

Services furnished by the Company may be connected with services or facilities of other authorized Common Carriers and with private systems, subject to the technical limitations established by the Company. The services of the Company are not part of a joint undertaking with any other entity providing telecommunications channels, facilities or services, but do involve the resale of the Message Toll Services (MTS) and Wide Area Telecommunications Services (WATS) of underlying Common Carriers who may be subject to the jurisdiction of this Commission.

The rates and regulations contained in this tariff apply only to the services furnished by the Company and do not apply, unless otherwise specified, to the lines, facilities, or services provided by a local exchange telephone company or other Common Carrier for use in accessing the services of the Company.

GENERAL DESCRIPTION OF TARIFF AND TERRITORY SERVED, CONT.

The Company's obligation to furnish service hereunder is dependent upon its ability to secure and retain, without unreasonable expense, suitable facilities and contractual rights necessary for the provision of the service.

The Company's Collect Call, Prepaid Collect Call, Pin Debit Services, and Debit Card Services are offered for Customer use 24 hours a day, seven days a week to all valid terminating locations specified in this section.

Establishment of a Prepaid Account or Debit Account entitles the consumer to access the Carrier's network for a preset amount of usage. Usage will be debited from the available account balance in full-minute increments.

Balances in a Prepaid Account and/or a Debit Account are refundable to the Customer if the Customer elects to close the prepaid account, or if service is terminated for reasons outlined in this tariff. The account may be considered abandoned after a specified period of inactivity after which no remaining funds will be refunded.

Balances in a Debit Card account are not refundable and the Debit Card account will be closed after a specified period of inactivity.

Customers may increase the available usage balance within an account by making additional payments to the Company.

SECTION 3 - DESCRIPTION OF SERVICES

3.1 GENERAL

Calls are billed individually for each call placed through the Carrier. Charges are computed on an airline mileage basis as described in Section 3.4 of this tariff.

Rates vary by mileage band, time of day, day of week and call duration.

Customers are billed based on their use of ATN's local and long distance service. No installation charges or fixed monthly recurring charges apply.

3.2 - PRODUCT DESCRIPTIONS

All intrastate services are offered in conjunction with similar interstate services.

3.2.1 Inmate Operator Assisted Collect Service allows End Users to place collect calls through an automated call processing system. The call processing system prompts the call originator and the called party such that the call is completed without live operator assistance. Calls are placed collect to the called party. Collect Calling is a billing arrangement whereby the originating caller bills the charges for a call to the called party, provided that the called party agrees to accept the charges.

3.2.2 A Prepaid "Collect" Account or Debit Account preserves the features of a collect call, whereby the End Users place calls through an automated call processing system. The call processing system prompts the call originator and the called party such that the call is completed without operator assistance. The Customer may refuse to accept the call and no charges will accrue. Should the called party agree to accept the charges, the charges for the call will be deducted from the Customer prepaid account at the completion of the call. If the charges for the call exceed the available prepaid account balance, the automated equipment may terminate the call when the account remaining account balance will not cover the charges for one additional minute.

3.2.3 A Debit Card Account is an End User or Customer prepaid account wherein a specified value of call services is purchased by either the End User or Customer. Unlike a prepaid or advance payment account a Debit Card account balance is not held against future payment in that all inmate calling services are available for immediate consumption.

This will be determined by the standard industry method for ascertaining answer and disconnect, including hardware answer supervision in which the LEC sends a signal to the switch or the software utilizing audio tone detection, or as determined by standard industry methods generally in use for ascertaining answer and disconnect as determined by the underlying Common Carrier for the Company's services, where answer supervision is available.
- 3.3.3 Calls are billed in full minute increments.
- 3.3.4 There are no charges incurred or billed for calls that are not completed or accepted by the called party.

3.4 - CALCULATION OF DISTANCE ("V&H")

- 3.4.1 Usage charges for all mileage-sensitive products are based on the airline distance between serving wire centers associated with the originating and terminating points of the call.
- 3.4.2 The service wire centers of a call are determined by the area codes and exchanges of the origination and destination points.
- 3.4.3 The distance between the wire center of the Customer's equipment and that of the destination point is calculated by using the vertical ("V") and horizontal ("H") coordinates found in Bellcore's V&H Tape and NECA FCC Tariff No. 4.
 - Step 1 - Obtain the "V" and "H" coordinates for the wire centers serving the Customer and the destination point.
 - Step 2 - Obtain the difference between the "V" coordinate of each of the wire centers. Obtain the difference between the "H" coordinates.

TARIFF FORMAT

- A. Page Numbering - Page numbers appear in the upper right corner of the page. Pages are numbered sequentially. However, new pages are occasionally added to the tariff. When a new page is added between pages already in effect, a decimal is added. For example, a new page added between pages 4 and 5 would be 4.1.
- B. Page Revision Numbers - Revision numbers also appear in the upper right corner of each page. These numbers are used to determine the most current page version on file with the Commission. For example, the 4th revised Page 4 cancels the 3rd revised Page 4.
- C. Paragraph Numbering Sequence - There are five levels of paragraph coding. Each level of coding is subservient to its next higher level:
- 2
 - 2.1
 - 2.1.1
 - 2.1.1.(A)
 - 2.1.1.(A).1
 - 2.1.1.(A).1.(a).
 - 2.1.1.(A).1.(a).I.
 - 2.1.1.(A).1.(a).I.(i).
 - 2.1.1.(A).1.(a).I.(i).(1).
- D. Check Sheets - When a tariff filing is made with the Commission, an updated check sheet accompanies the tariff filing. The check sheet lists the pages contained in the tariff, with a cross-reference to the current revision number. When new pages are added, the check sheet is changed to reflect the revision. All revision made in a given filing are designated by an (*). There will be no other symbols used on this sheet if these are the only changes made to it (i.e., the format, etc., remains the same just revised notation levels on some sheets). The tariff user should refer to the latest check sheet to find out if a particular sheet is the most current sheet on file with the Commission.

GENERAL DESCRIPTION OF TARIFF AND TERRITORY SERVED

This tariff contains the description of the services offered, the terms and conditions under which each of the services are provided and all effective rates and charges applicable to the furnishing of interexchange telecommunications services and operator services of ATN, Inc. d/b/a Amtel, to inmates of prisons, jails or other confinement institutions within the state of Alabama. Only those services, terms and conditions and rates and charges approved by the Alabama Public Service Commission and contained in this tariff may be provided to Customers within the State. Filed tariffs are binding on the Company and no deviation of any kind from the filed tariff is permitted.

The services offered by the Company subject to this tariff consist of furnishing Collect, Person to Person Collect Calls, Prepaid Collect Calls, and Debit Card Calls through store and forward technology incorporating an automated operator and the resale of transmission services of other carriers.

Because the services offered hereunder are provided to inmates of a correctional facility or similar institution, special stipulations may apply. These stipulations are designed to preserve the integrity and security of the facility, the safety of the public and to reduce fraud and harassment. When deemed appropriate by the facility administration, these include: providing outward only calls; providing 0+ Collect Calls only for local, intraLATA toll and interLATA toll calls and blocking access to all other types or forms of calls; blocking access to local Directory Assistance (411), long distance Directory Assistance (555-1212), 911 calls, toll free numbers including 1-800, 700, 900, 950, 10XXX and any other telephone numbers the facility administration directs; limiting hours during which telephone service is available to inmates; and/or limiting call duration to a time interval established by the facility administration.

Services furnished by the Company may be connected with services or facilities of other authorized Common Carriers and with private systems, subject to the technical limitations established by the Company. The services of the Company are not part of a joint undertaking with any other entity providing telecommunications channels, facilities or services, but do involve the resale of the Message Toll Services (MTS) and Wide Area Telecommunications Services (WATS) of underlying Common Carriers who may be subject to the jurisdiction of this Commission.

The rates and regulations contained in this tariff apply only to the services furnished by the Company and do not apply, unless otherwise specified, to the lines, facilities, or services provided by a local exchange telephone company or other Common Carrier for use in accessing the services of the Company.

GENERAL DESCRIPTION OF TARIFF AND TERRITORY SERVED, CONT.

The Company's obligation to furnish service hereunder is dependent upon its ability to secure and retain, without unreasonable expense, suitable facilities and contractual rights necessary for the provision of the service.

The Company's Collect Call, Prepaid Collect Call, Pin Debit Services, and Debit Card Services are offered for Customer use 24 hours a day, seven days a week to all valid terminating locations specified in this section.

Establishment of a Prepaid Account or Debit Account entitles the consumer to access the Carrier's network for a preset amount of usage. Usage will be debited from the available account balance in full-minute increments.

Balances in a Prepaid Account and/or a Debit Account are refundable to the Customer if the Customer elects to close the prepaid account, or if service is terminated for reasons outlined in this tariff. The account may be considered abandoned after a specified period of inactivity after which no remaining funds will be refunded.

Balances in a Debit Card account are not refundable and the Debit Card account will be closed after a specified period of inactivity.

Customers may increase the available usage balance within an account by making additional payments to the Company.

SECTION 3 - DESCRIPTION OF SERVICES

3.1 GENERAL

Calls are billed individually for each call placed through the Carrier. Charges are computed on an airline mileage basis as described in Section 3.4 of this tariff.

Rates vary by mileage band, time of day, day of week and call duration.

Customers are billed based on their use of ATN's local and long distance service. No installation charges or fixed monthly recurring charges apply.

3.2 - PRODUCT DESCRIPTIONS

All intrastate services are offered in conjunction with similar interstate services.

3.2.1 Inmate Operator Assisted Collect Service allows End Users to place collect calls through an automated call processing system. The call processing system prompts the call originator and the called party such that the call is completed without live operator assistance. Calls are placed collect to the called party. Collect Calling is a billing arrangement whereby the originating caller bills the charges for a call to the called party, provided that the called party agrees to accept the charges.

3.2.2 A Prepaid "Collect" Account or Debit Account preserves the features of a collect call, whereby the End Users place calls through an automated call processing system. The call processing system prompts the call originator and the called party such that the call is completed without operator assistance. The Customer may refuse to accept the call and no charges will accrue. Should the called party agree to accept the charges, the charges for the call will be deducted from the Customer prepaid account at the completion of the call. If the charges for the call exceed the available prepaid account balance, the automated equipment may terminate the call when the account remaining account balance will not cover the charges for one additional minute.

3.2.3 A Debit Card Account is an End User or Customer prepaid account wherein a specified value of call services is purchased by either the End User or Customer. Unlike a prepaid or advance payment account a Debit Card account balance is not held against future payment in that all inmate calling services are available for immediate consumption.

SECTION 3 - DESCRIPTION OF SERVICES, CONT.

3.3 - TIMING OF CALLS

- 3.3.1 Long distance usage charges are based on actual usage of ATN's network. Timing for automated collect calls begins when the called party accepts the charges for the call.
- 3.3.2 Timing of each Collect Call begins when the called party accepts responsibility for the charges and ends upon disconnection by either party, or hanging up. This will be determined by the standard industry method for ascertaining answer and disconnect, including hardware answer supervision in which the LEC sends a signal to the switch or the software utilizing audio tone detection, or as determined by standard industry methods generally in use for ascertaining answer and disconnect as determined by the underlying Common Carrier for the Company's services, where answer supervision is available.
- 3.3.3 Calls are billed in full minute increments.
- 3.3.4 There are no charges incurred or billed for calls that are not completed or accepted by the called party.

3.4 - CALCULATION OF DISTANCE ("V&H")

- 3.4.1 Usage charges for all mileage-sensitive products are based on the airline distance between serving wire centers associated with the originating and terminating points of the call.
- 3.4.2 The service wire centers of a call are determined by the area codes and exchanges of the origination and destination points.
- 3.4.3 The distance between the wire center of the Customer's equipment and that of the destination point is calculated by using the vertical ("V") and horizontal ("H") coordinates found in Bellcore's V&H Tape and NECA FCC Tariff No. 4.

Step 1 - Obtain the "V" and "H" coordinates for the wire centers serving the Customer and the destination point.

Step 2 - Obtain the difference between the "V" coordinate of each of the wire centers. Obtain the difference between the "H" coordinates.

- Step 6 - Obtain the square root of the whole number obtained in Step 5. Round to the next higher whole number if any fraction is obtained. This is the distance between the wire centers.

Formula:
