**THE HUB SYSTEM: PROFILE OF INMATES
UNDERCUSTODY ON JANUARY 1, 2001**

George E. Pataki
Governor

Glenn S. Goord
Commissioner

EXECUTIVE SUMMARY

In 1992, the New York State Department of Correctional Services reorganized the delivery of program services to the inmate population. One of the components of this plan is grouping the correctional facilities by geographical proximity into administrative regions. This report presents a profile of the inmate population within each region. This executive summary briefly describes the characteristics of the total undercustody population and then lists the range of values found across the nine administrative HUBs on a selected set of variables.

CHARACTERISTICS	CATEGORY	TOTAL UNDERCUSTODY	RANGE ACROSS HUBS	
			Low	High
Gender	Female	4.7%	0.0%	20.7%
Age	Average age	34.3 yrs	29.6 yrs	37.2 yrs
Race/ethnic status	White African American Hispanic	16.9% 50.9% 30.4%	10.9% 47.8% 26.4%	23.1% 53.5% 34.5%
Region	From New York City	63.6%	50.7%	76.6%
Birthplace	Foreign Born	12.5%	9.3%	15.8%
Marital Status	Never married	64.9%	57.1%	74.8%
Living Children	One or more living children	59.2%	46.0%	63.7%
Religious Affiliation	Catholic Protestant Islam	31.1% 30.0% 16.0%	27.4% 26.9% 14.0%	34.5% 34.0% 19.0%
Veteran Status	Veteran	5.8%	4.3%	7.8%
Minimum Sentence	Average minimum sentence in months	91.0 mos.	47.0 mos.	134.3 mos.
Crime	Violent Felony	53.6%	40.9%	72.0%
Second felony offender status	Second felony	49.8%	39.8%	61.9%

CHARACTERISTICS	CATEGORY	TOTAL UNDER CUSTODY	RANGE ACROSS HUBS	
			Low	High
Prior adult criminal record	Prior prison term	35.2%	28.3%	41.6%
Time served at current facility	Median time served in months	7.3 mos.	4.6 mos.	13.4 mos.
Time served in Department custody	Median time served in months	25.3 mos.	13.3 mos.	65.1 mos.
Time to earliest release	Median time to release in months	15.2 mos.	11.5 mos.	25.6 mos.
Reading level	Test results at 7 th grade or below for all inmates	30.8%	21.7%	34.3%
Academic Degree	Verified high school diploma or above	47.2%	43.7%	60.6%
English language fluency	English dominant	89.4%	86.7%	92.0%

THE HUB SYSTEM: PROFILE OF INMATE POPULATION UNDERCUSTODY ON JANUARY 1, 2001

INTRODUCTION

The New York State Department of Correctional Services reorganized the delivery of program services to the inmate population in 1992. One of the important components of this plan was the grouping of correctional facilities by geographical proximity into administrative regions. These administrative regions, referred to as Hubs, are groups of neighboring facilities that share administrative, support and program services. Each Hub has a core or "HUB" facility at which inmates are received and from which inmate movement and other administrative service delivery functions are controlled.

Purpose of the Report

The sections of this report profile the inmate population in each Hub as well as the population at each of the correctional facilities within the Hub. These profiles contain information on demographic characteristics and on other variables. These data will familiarize staff at each Hub with the overall characteristics of inmates in the Hub population as well as with differences in the characteristics of the inmate population at each of the respective facilities in the Hub. This information permits comparisons with the characteristics of the inmate population between the different Hubs. The report serves as a profile of the undercustody population at the beginning of the year 2001.

In the tables and graphs presented in the report each Hub is identified by the administrative facility for that Hub. Staff often refer to each Hub by the administrative facility for that Hub. The Hub facility for each Hub (along with a short abbreviation used in graphic displays) is as follows: Oneida C.F., Oneida Hub (ONI); Watertown C.F., Watertown Hub (WAT); Clinton C.F., Clinton Hub (CLI); Sullivan C.F., Sullivan Hub (SUL); Green Haven C.F., Green Haven Hub (GH); Great Meadow C.F., Great Meadow Hub (GM); Wende C.F., Wende Hub (WEN); Elmira C.F., Elmira Hub (ELM); Sing Sing C.F., New York City Hub (NYC). Appendix A presents a map showing the 9 regional Hubs and the correctional facilities within each.

For the readers who wish to track specific Hub profiles from year-to-year, please note the following changes that have occurred since January 1, 2000:

- Camp Georgetown was moved from the Elmira Hub to the Oneida Hub.
- Camp Pharsalia was moved from the Elmira Hub to the Oneida Hub.
- Sing Sing was moved from the Green Haven Hub to the New York City Hub.
- Five Points was added to the Elmira Hub.

Section One

DEMOGRAPHIC CHARACTERISTICS

Gender Distribution

There were 70,153 inmates under custody on January 1, 2001, of whom 66,874 (95.3%) were men and 3,279 (4.7%) were women (see Table 1). The inmate population decreased by 1,313 (1.8%) since January 1, 2000 (N = 71,466). Male inmates decreased by 1,084 (1.6%) and female inmates decreased by 229 (6.5%). Female inmates decreased from 4.9% of total population in January 2000 to 4.7% in January 2001.

Females are incarcerated in three of the nine Hubs. For these three, the percentage of a Hub's total population that consists of women ranges from 8.6% in the New York City Hub to 20.7% in the Green Haven Hub (see Table 1 and Figure 1).

Age Distribution

Table 2 shows the age distribution by Hub. The largest cohort was inmates 30-34 years old (13,312, 19.0%). The second largest age cohort was inmates 35-39 years old (13,151, 18.7%).

Sixteen to eighteen year old inmates, for whom the State must provide schooling, constituted 1.3% ($N = 890$) of the total undercustody population as of January 1, 2001. There were more than 100 inmates age 16 - 18 in three of the nine Hubs. For programmatic purposes the Department has increased the concentration of younger inmates at selected facilities in the Great Meadow Hub (see Figure 2). The average and median age of inmates housed at each facility is presented in Table 2A.

Inmates sixty or more years old constituted 1.5% ($N=1,035$) of the 70,153 inmates undercustody. The Oneida, Clinton, Sullivan, Green Haven, and Wende Hubs all have at least 100 inmates who are sixty or older.

Race/Ethnic Distribution

Race/ethnic status of undercustody inmates is shown in Table 3. Approximately half (50.9%) of the inmates were African-American; approximately one-third were Hispanic (30.4 %); and the remainder were White (16.9%), or other and unknown ethnic groups (1.8%). There was variability in the distribution of persons of each of the ethnic groups between Hubs. For example, the percent of Whites ranged from 10.9% in the New York City Hub to 23.1% in the Wende Hub (see Figure 3). Among Hispanics, the range was from 26.4% in the Wende Hub to 34.5% in the Oneida Hub. Among African-Americans, the range was from 47.8% in the Oneida Hub to 53.5% in the Watertown Hub.

Region of Commitment

The majority of inmates were committed from New York City (63.6%). An additional 10.3% were committed from suburban New York, 14.7% from upstate counties with a population center containing 50,000 inhabitants or more, and 11.4% from the remaining upstate counties. There were differences across the Hubs in the proportion of inmates from each region of the state. The Wende and Elmira Hubs in the western part of the state had a somewhat higher concentration of inmates committed from upstate urban and upstate rural counties (see Figure 4). Correspondingly, Green Haven, Sullivan, Watertown and New York City Hubs had a higher concentration of inmates from New York City or Suburban New York City counties. These differences are in part due to housing work release inmates at facilities near the residence county of the inmate.

Country of Birth

Seventy-nine percent (79.0%) of undercustody inmates were born in the United States and an additional eight percent in one of its territories (8.1%) including American Samoa, Panama Canal Zone, Guam, U.S. Virgin Islands and Puerto Rico (see Table 5). Approximately 12.5% ($N = 8,776$) of the undercustody inmates were born in a foreign country. Most of the inmates born in a foreign country were from one of the island nations in the Caribbean basin ($N = 5,450$ or 7.8% of undercustody inmates).¹

Foreign birth may have implications for programming decisions, due to differences in culture or language (many inmates from the Caribbean, South America, or Central America are Spanish dominant). The percent of foreign born inmates ranged from 9.3% in the Elmira Hub to 15.8% in the Green Haven Hub (see Figure 5 and Table 5).

Figure 5
Foreign Born Inmates Undercustody

¹ For additional information on foreign born inmates see "The Impact of Foreign-Born Inmates on the New York State Department of Correctional Services" (January, 2001), New York State Department of Correctional Services, Albany, New York 12226.

Marital Status

Almost a fifth (19.9%) of undercustody inmates were legally married at the time of commitment. Another 6.9% were living in a common law arrangement at the time of their commitment. The majority were single, never married (64.9%); the balance were separated/divorced (8.9%); or widowed (1.9%) (see Table 6).

The distribution of single, never married inmates among Hubs ranged from 57.1% in the Sullivan Hub to 74.8% in the Great Meadow Hub, the Hub with the highest proportion of young inmates (see Figure 6).

Number of Living Children

The majority of inmates under custody (59.2%) had at least one living child (see Table 7 and Figure 7). Approximately 10% of under custody inmates reported four or more living children. The percentage of inmates with at least one child varied considerably from 46.0% in the Great Meadow Hub to 63.7% in the Watertown Hub. The Great Meadow Hub, with the highest concentration of young offenders, had the lowest percentage of inmates with children.

Religious Affiliation

Eighty-six percent (86.5%) of undercustody inmates claimed affiliation with a recognized religion. Over sixty percent (61.1%) belonged to a Christian faith. Sixteen percent (16.0%) affiliated with the Islamic faith and nine percent (9.4%) with other religions (see Table 8). Fourteen percent (13.5%) either did not claim affiliation with a religion or there was no information about them.

Catholics were the single largest religious group at 31.1%. The variation across Hubs in Catholic inmates was from 27.4% in the Elmira Hub to 34.5% in the Oneida Hub (see Figure 8).

Veteran Status

Veterans undercustody are eligible for various benefits² and as a result the Department tracks the number of veterans in its custody. The Department operates programs for veterans of military service at several facilities.

The Department had veteran information on 69,461 inmates undercustody, of whom 4,012 were veterans of the armed forces (5.8%). Of the veterans, 2,267 were post-Vietnam War-era veterans and 1,251 were Vietnam War-era veterans; an additional 242 served prior to Vietnam and for 252 veterans the era of service was unknown (see Table 9). Figure 9 shows the proportion of veterans in each Hub. The distribution of veteran inmates ranged from a low of 4.3% in the Great Meadow Hub to a high of 7.8% in the Sullivan Hub.

Section Two

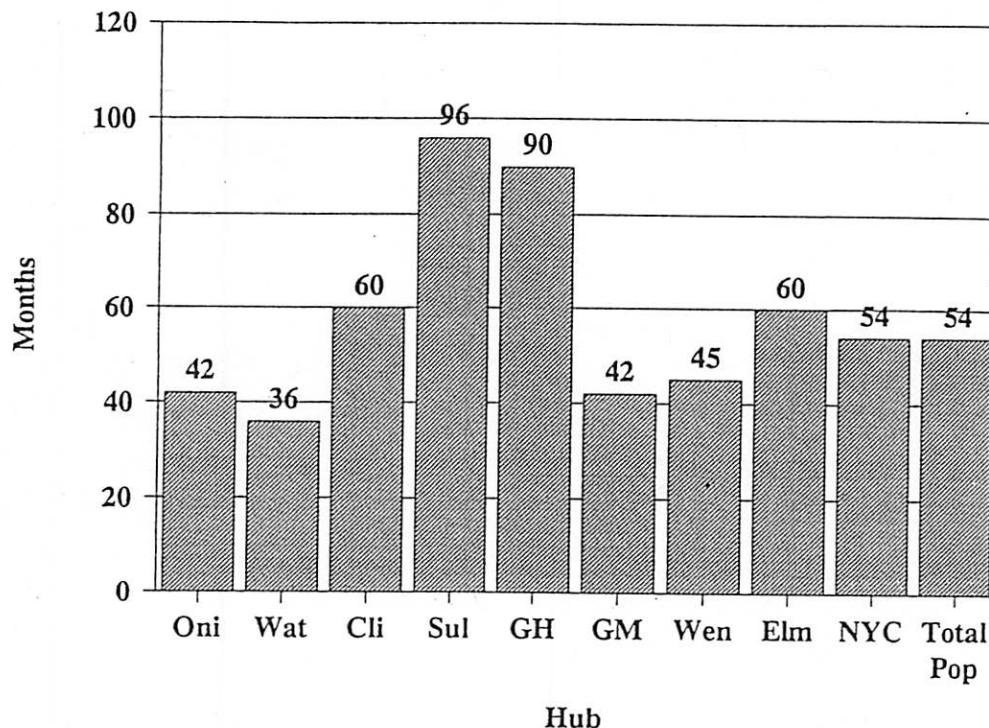

CRIMINAL HISTORY

Minimum Sentence

The median minimum sentence of undercustody inmates was 54.0 months. However, the average minimum sentence length was 91.0 months (over seven years), reflecting the influence of lengthy minimum sentences received by many inmates in the maximum security facilities (see Table 10 and Table 10A).³

There were differences between Hubs in average and median minimum sentence length (see Table 10A and Figure 10), but these differences were partially driven by the number of maximum security facilities in each Hub. Inmates with long sentences are more likely to be confined in maximum security facilities. Hubs where the ratio of maximum security inmates to all other inmates is high will tend to have a higher proportion of inmates with lengthy minimum terms. Median minimum sentence length ranged from 36 months in the Watertown Hub to a high of 96 months in the Sullivan Hub (see Table 10A). The median minimum sentence for persons in maximum security facilities was 114 months; and for those in medium security facilities, it was 48 months (see Table 10B). For inmates in minimum security facilities the median minimum term was 30 months. Table 10B shows the distribution of minimum sentence by facility security level. Table 10C shows the average and median minimum sentence by facility security level.

Figure 10
Median Minimum Sentence

³ The median is a measure of central tendency which represents the value of the middle case (i.e. the case or cases at the 50th percentile) in the distribution of cases. The median is less subject to the influence of extreme values than is the arithmetic average and is preferred by some users for this reason.

Commitment Crime

Almost one-third (30.2%) of undercustody inmates were committed for drug offenses; 18.4% for robbery (total of Robbery 1st, Robbery 2nd, and Robbery 3rd, see Table 11) and 9.9% for murder (see Table 11). Many inmates were committed for multiple crimes. For those offenders with more than one commitment crime, the crime with the longest maximum term is the crime reflected in Table 11.

Variation in the percent of drug offenders housed at each Hub was considerable; the percents ranged from 20.3% in the Sullivan Hub to 41.7% in the Oneida Hub (see Table 11A). Similarly, the percent of inmates that are violent felony offenders ranged from 40.9% in the Oneida Hub to 72.0% in the Sullivan Hub (see Figure 11 and Table 11A).

Second Felony Offender Status

Half of the inmates (49.8%) under custody on January 1, 2001 were second felony offenders (see Table 12), forty-seven percent (46.7%) were first felony offenders and four percent (3.6%) were persistent felony offenders. The percent of second felony offenders under custody ranged from 39.8% in the Great Meadow Hub to 61.9% in the Watertown Hub (see Figure 12).

Prior Adult Criminal Record

Inmates are placed in a category based on their most extensive penetration into the criminal justice system prior to their current incarceration. Thirty-five percent (35.2%) of undercustody inmates had served a prior prison term. For twenty-four percent (24.2%) prior jail was the most serious contact with the criminal justice system. Twenty percent (19.8%) had a prior conviction without jail or prison incarceration. Eight percent (7.9%) had no prior conviction and thirteen percent (13.1%) had no prior arrest.

The percent of inmates with a prior prison term varied from 28.3% in the Green Meadow Hub to 41.6% in the Watertown Hub (see Figure 13). The percent of inmates with a prior arrest ranged from 9.5% in the Watertown Hub to 18.2% in the Green Haven Hub.

Length of Time Served at Current Holding Facility

The average amount of time served at the current facility was 14.9 months and the median was 7.3 months (see Table 14A). Comparing the Hubs, the range in average time served was 10.2 months in the Watertown Hub to 23.8 months in the Green Haven Hub. The median time at current holding facility ranged from 4.6 months in the Elmira Hub to 13.4 months in the Sullivan Hub (see figure 14). Information on length of time served at current holding facility is useful to facility staff when planning inmate program assignments. Staff use this information to help design assignments that minimize the risk of disruption to the inmate's program plan due to transfer or release.

Length of Time in Department Custody

Table 15A shows that the inmates held undercustody on January 1, 2001 had spent on average 44.9 months in DOCS since their latest admission date. The median length of time was 25.3 months. Table 15 shows that 14,121 (20.1%) had spent 72 months or more undercustody as of January 1, 2001 and 6,706 (9.6%) had spent less than 3 months undercustody as of that date. Table 15A shows inmates in the Sullivan Hub had served the longest (median 65.1 months) and Watertown Hub had the lowest median time served (13.3 months).

The 14,121 inmates undercustody 72 months or more is a general indicator of the current "long termer" population in New York State correctional facilities. Long term inmates may require a somewhat different sequence (or mix) of education, vocational training and then work assignment than would be true for other inmates with comparatively shorter sentences.

Time to Earliest Release Eligibility

Time to earliest release date is a measure of the earliest possible date at which the inmate can be legally released. Inmates are not necessarily released on this date because the parole board may require the inmate to remain in prison beyond the earliest legal release date, or, the inmate may lose good time due to poor discipline and thus remain in prison longer.

Table 16A shows that the "average time to earliest release" for the total undercustody population on January 1, 2001 was 41.7 months and the "median time to earliest release" was 15.2 months.

The range of median time to serve by Hub was considerable. In the Watertown Hub, the median time to earliest release was just 11.5 months. However, in the Green Haven Hub it was 25.6 months (see Figure 16). Figures on average time to earliest release showed even wider variation: 15.6 months in the Watertown Hub and 70.3 months in the Green Haven Hub.

Section Three

PROGRAM RELEVANT CHARACTERISTICS

Reading Proficiency

The Department's education program objective is to encourage every inmate to pass a high school equivalency General Education Diploma (GED) test while incarcerated. Testing and education programming are used by the Department to track the academic levels of inmates in reading and mathematics. In order to take the GED examination the Department requires inmates to take tests demonstrating at least an eighth grade level in reading and mathematics.⁴

Data on reading proficiency and academic degree status were taken from a data file compiled on January 13, 2001. The number of cases on these educational tables ($N=69,993$) is slightly different than that for earlier tables (e.g. 70,153 in Table 1). The data is presented for total inmates for all examinations (Table 17), English language examinations (Table 17A) and Spanish language examinations (Table 17B). Inmates with reading levels in the 0 – 4th grade range require adult basic education (ABE) courses. Inmates in the 5 – 7th grade range require course work to improve their test scores before being eligible for the GED examinations. Inmates in the 8 – 12th grade category are eligible to take the GED examinations.

Table 17 shows that of the 69,993 inmates under custody on January 13, 2001, 33,037 (47.2%) had a verified GED, high school diploma or higher degree, and 36,956 (52.8%) were without academic degrees. Not eligible to take a GED exam were 9,635 inmates (13.8%) whose reading ability was below the fifth grade level, and 11,912 inmates (17%) whose reading ability was below the eighth grade level. These inmates require additional services in order to qualify to take a GED exam.

The percent of inmates in each HUB whose reading ability level was eighth grade or below is presented in Figure 17. Sullivan Hub had the lowest percent of inmates reading below the eighth grade level (21.7%). Watertown Hub had the highest percent of inmates reading below the eighth grade level (34.3%).

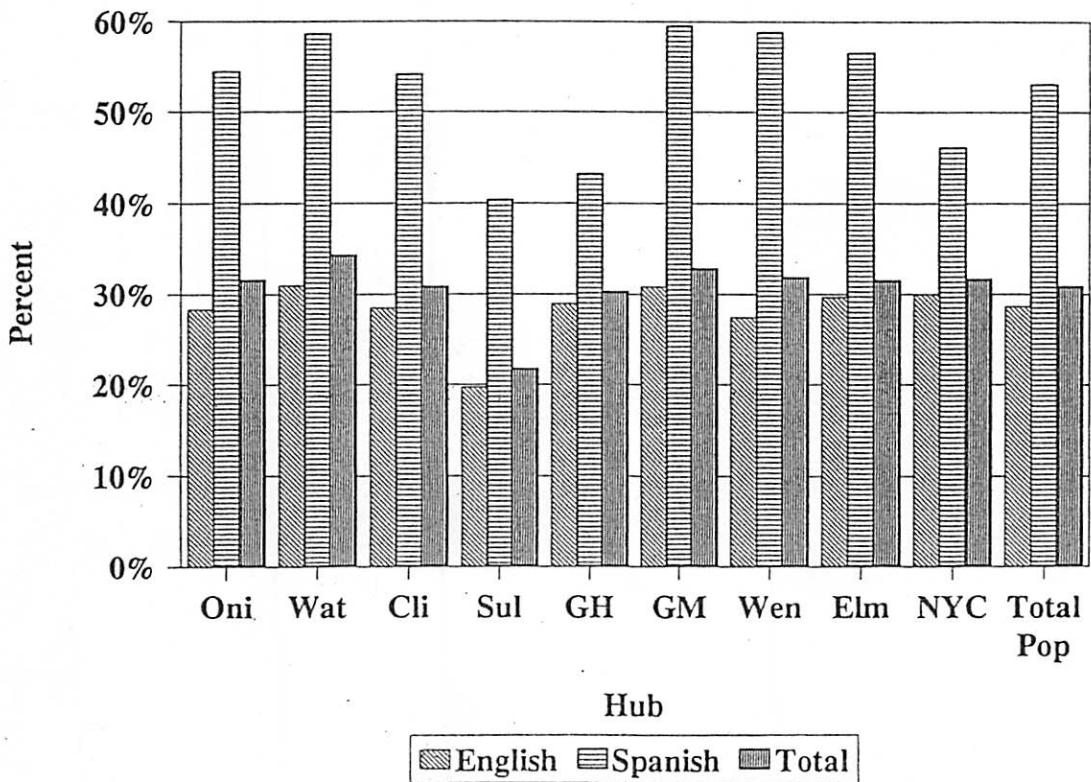

Table 17A shows the reading level test results for inmates taking English language reading tests. This group of inmates was comprised of 94.9% fluent in English ($N = 60,467$), 1.2% no preference for English or other language ($N = 784$), 0.6% other languages ($N = 353$) and 3.3% no language preference recorded ($N = 2,102$). Of these inmates, 31,156 (48.9%) had a verified GED, high school diploma, or higher degree. Of the remaining 32,550 inmates, 12,870 can read at the eighth grade level or above and are eligible to take a GED examination. There

⁴ see Department Directive #4804, NY DOCS, Albany, N.Y. 12226

were 18,214 inmates reading below the eighth grade level and required additional education courses to be eligible for the GED examination. English reading level results ranged by Hub from 19.7% reading below eighth grade level at the Sullivan Hub to 31.0% at the Watertown Hub.

Table 17B shows the reading level for the Spanish dominant inmates undercustody on January 13, 2001. Of the 6,287 Spanish dominant inmates, 1,881 (29.9%) had a verified diploma from a high school or a degree beyond the high school level. Of the remaining 4,406 inmates, 981 could read in Spanish at an eighth grade level or above and according to Departmental policy were eligible to take the General Education Diploma (GED).⁵ Inmates who are unable to take the GED in English may take a Spanish language GED test. Table 17B shows that there were 3,373 Spanish dominant inmates who read below the eighth grade level and required additional education services to qualify to take a GED exam. Spanish reading level results were lowest with 40.3% of inmates in the Sullivan Hub reading below eighth grade level and highest with 59.5% in the Great Meadow Hub.

ONLY VERIFIED DATA ON EDUCATION REPORTED

Academic Degree Status

Table 18 presents data on the educational attainment of persons undercustody on January 13, 2001. The data reveal that only 33,037 (47.2%) inmates had at least a high school diploma or General Education Diploma out of 69,993 undercustody inmates. The Department only recognizes academic degrees that can be verified from an outside source.

A comparison of the Hubs by percent of inmates with a GED, high school diploma or higher degree shows that the Sullivan Hub had the highest percent at 60.6% while the Watertown Hub had the lowest percent at 43.7%.

English Language Proficiency

The vast majority (89.4%) of inmates under custody are English language dominant (see Table 19). There were also 6,322 inmates who were Spanish language dominant (9.1%). The number of Spanish language dominant on January 1, 2001 ($N=6,322$) differs slightly from Spanish language dominant on January 13, 2001 ($N=6,287$) as reported in the section on reading proficiency. Spanish dominant inmates were present in significant numbers in several Hubs (also see Figure 19). For instance, the Wende Hub in the western part of the state had 1,245 Spanish language dominant inmates; the Clinton Hub had 870 Spanish language dominant inmates and the Oneida Hub had 853 Spanish language dominant inmates. Spanish dominant inmates may require special programming and present special security problems because of their limited English comprehension.

Michigan Alcoholism Screening Test Score

Alcoholism is a serious problem in the undercustody population. To assess the extent of alcoholism the Michigan Alcoholism Screening Test (MAST) is administered to inmates during the reception/classification process. For purposes of this report "alcoholic" is defined as a score of 9 or higher on the MAST. A score of between 5 and 8 on the MAST is defined as "suggestive alcoholism". Of the 61,580 inmates for whom test results were available 25.9% ($N=15,924$) were defined as alcoholic and another 13.8% ($N=8,490$) were possibly alcoholic (see Table 20). The Hubs varied in the percent alcoholic or possibly alcoholic; the Clinton Hub had 32.6% alcoholic or possibly alcoholic and the Wende Hub had 50.0% alcoholic or possibly alcoholic (see Figure 20). The high percent of alcoholic inmates in the Wende Hub was in part due to the Driving While Intoxicated Program at Gowanda C.F. As of January 1, 2001, there were 317 inmates at Gowanda C.F. serving a sentence for DWI (see Table 11, p. 30).

Drug Use

Fifty-three percent (53.4%) of undercustody inmates admitted to drug use prior to confinement on the instant offense (see Table 21). This included 25.0% who admitted to cocaine use (including crack or crystalline cocaine) either alone or in combination with other drugs. Other drugs used by a substantial number of inmates included substances containing cannabis (e.g. marijuana) and narcotics. Table 21 shows that many inmates were multiple drug users. The following ranking system has been used to assign multiple drug users to a category: (1) cocaine or crack, (2) hallucinogens, (3) narcotics, (4) cannabis, (5) other drugs. If a person uses cocaine and narcotics, cocaine use is counted. Similarly, if marijuana and narcotics are both used, narcotics is counted.

There was variation across the Hubs in the percentage of inmates who admitted drug use (see Figure 21). For example, in the New York City Hub, thirty-one percent (31.0%) of inmates admitted prior use of cocaine in some form whereas only twenty percent (19.6%) of inmates in the Great Meadow Hub claimed to have used it. Thirty-eight percent (38.3%) of inmates in the New York City Hub denied drug use compared to forty-eight percent (47.9%) of inmates in the Clinton Hub.
