Commissioner

**THE HUB SYSTEM: PROFILE OF INMATE POPULATION
UNDER CUSTODY ON JANUARY 1, 2006**

EXECUTIVE SUMMARY

In 1992, the New York State Department of Correctional Services reorganized the delivery of program services to the inmate population. One of the components of this plan is grouping the correctional facilities by geographical proximity into administrative regions. This report presents a profile of the inmate population within each region. This executive summary briefly describes the characteristics of the total under custody population and then lists the range of values found across the nine administrative HUBS on a selected set of variables.

Characteristics	Category	Total Under Custody	Range Across Hubs	
			Low	High
Gender	Female	4.5%	0.0%	20.8%
Age	Average Age	36.2	31.4	39.3
Race/Ethnic Status	White	19.9%	11.1%	28.0%
	African-American	50.9%	47.7%	55.5%
	Hispanic	27.0%	22.1%	33.9%
Region	From New York City	55.3%	38.6%	76.5%
Birthplace	Foreign Born	11.3%	7.9%	16.4%
Marital Status	Never Married	65.0%	56.5%	75.5%
Living Children	One or more living children	59.2%	46.8%	64.2%
Religious Affiliation	Catholic	27.6%	21.2%	32.0%
	Protestant	30.3%	26.8%	34.1%
	Islam	13.8%	11.3%	17.5%
Veteran Status	Veteran	5.7%	2.4%	7.5%
Minimum Sentence	Average Minimum Sentence in months	106.2	52.8	154.7
Crime	Violent Felony	57.5%	41.3%	75.0%
Second Felony Offender Status	Second Felony	44.7%	34.3%	59.6%

**THE HUB SYSTEM: PROFILE OF INMATE POPULATION
UNDER CUSTODY ON JANUARY 1, 2006**

Characteristics	Category	Total Under Custody	Range Across Hubs	
			Low	High
Prior Adult Criminal Record	Prior prison term	35.1%	26.9%	41.3%
Time Served at Current Facility	Median time served in months	8.0	6.3	12.0
Time Served in Department Custody	Median time served in months	25.8	17.1	74.2
Time to Earliest Release	Median time to release in months	16.8	11.9	30.0
Reading Level	Test results at 8th grade level or below for all inmates	34.4%	25.3%	39.5%
Academic Degree	Verified high school diploma or above	51.4%	45.9%	63.0%
English Language Fluency	English dominant	91.4%	88.3%	94.1%
Substance Abuse	Reported substance abuse (includes alcohol)	71.9%	64.8%	78.5%
Alcoholism	Alcoholic/Possibly alcoholic	39.6%	32.2%	48.3%

THE HUB SYSTEM: PROFILE OF INMATE POPULATION UNDER CUSTODY ON JANUARY 1, 2006

INTRODUCTION

The New York State Department of Correctional Services reorganized the delivery of program services to the inmate population in 1992. One of the important components of this plan was the grouping of correctional facilities by geographical proximity into administrative regions. These administrative regions, referred to as Hubs, are groups of neighboring facilities that share administrative support and program services. Each Hub has a core facility at which inmates are received and from which inmate movement and other administrative service delivery functions are controlled.

Purpose of the Report

The sections of this report profile the inmate population in each Hub as well as the population at each of the correctional facilities within the Hub. These profiles contain information on demographic characteristics and on other variables. These data will familiarize staff at each Hub with the overall characteristics of inmates in the Hub population as well as with differences in the characteristics of the inmate population at each of the respective facilities in the Hub. This information permits comparisons with the characteristics of the inmate population between the different Hubs. The report serves as a profile of the under custody population at the beginning of the year 2006.

In the tables and graphs presented in the report each Hub is identified by the administrative facility for that Hub. Staff often refer to each Hub by the administrative facility for that Hub. Appendix A presents a map showing the nine regional Hubs and the correctional facilities within each.

Section One

DEMOGRAPHIC CHARACTERISTICS

Gender Distribution

There were 62,732 inmates under custody on January 1, 2006, of whom 59,930 (95.5%) were men and 2,802 (4.5%) were women (see Table 1). Female inmates retained almost the same proportion of the total population in January 2006 compared with January 2005 at 4.4% of the population.

The inmate population decreased by 966, a decline of 1.5 percent since January 1, 2005. Male inmates decreased by 979, a decline of 1.5 percent of the male inmate population. Female inmates increased by 13 or 0.5 percent of the female population.

Females are incarcerated in three of the nine Hubs. For these three, the percentage of a Hub's total population that consists of women ranges from 5.8% in the New York City Hub to 20.8% in the Green Haven Hub (see Table 1 and Figure 1).

Age Distribution

Table 2A shows the age distribution by Hub. The largest cohort was inmates 25-29 years old (10,681; 17.0%). The second largest age cohort was inmates 35-39 years old (10,088; 16.1%).

Sixteen to eighteen year old inmates, for whom the State must provide schooling, constituted 1.2% (N = 744) of the total under custody population as of January 1, 2006. There were more than 100 inmates age 16 - 18 in two of the nine Hubs. For programmatic purposes the Department has increased the concentration of younger inmates at selected facilities in the Great Meadow Hub (see Figure 2). The average and median age of inmates housed at each facility is presented in Table 2B.

Inmates sixty years old or older constituted 2.4% (N=1,499) of the 62,732 inmates under custody. The Oneida, Clinton, Sullivan, Green Haven, Great Meadow, Wende and Elmira Hubs all had at least 100 inmates who were sixty years old or older.

In January 2000, inmates aged 40 and older made up 27% of the under custody population; in 2006, inmates 40 and over made up 36% of the under custody population. In January 2000 inmates aged 60 and over made up 1.2% of the under custody population. This proportion has increased to 2.4% in this report. In recent years while total population has declined, the number of inmates age 60 and over has increased in absolute numbers. The result is an older inmate population.

Race/Ethnic Distribution

Race/ethnic status of under custody inmates is shown in Table 3. Half (50.9%) of the inmates were African-American, about a quarter were Hispanic (27.0%) and about one fifth White (19.9%), the remainder were Native American (0.7%), Asian (0.5%), other (0.6%), or unknown (0.3%). There was variability in the distribution of ethnic groups among Hubs. For example, the percent of Whites ranged from 11.1% in the New York City Hub to 28.0% in the Wende Hub (see Figure 3). Among Hispanics, the range was from 22.0% in the Elmira Hub to 33.9% in the Watertown Hub. Among African-Americans, the range was from 47.7% in the Wende Hub to 55.5% in the Elmira Hub.

Region of Commitment

The majority of inmates (55.3%) were committed from New York City (New York City is comprised of Kings, New York, Queens, Richmond and Bronx counties). An additional 10.9% were committed from suburban New York (Nassau, Rockland, Suffolk, and Westchester counties), 19.0% from upstate counties with a population center containing 50,000 inhabitants or more (Albany, Broome, Erie, Monroe, Oneida, Onondaga, Rensselaer, and Schenectady counties), and 14.8% from the remaining upstate counties. There were differences across the Hubs in the proportion of inmates from each region of the state. The Wende and Elmira Hubs in the western part of the state had a lower concentration of inmates from New York City and a higher concentration of inmates committed from upstate counties (see Figure 4). Correspondingly, Sullivan and New York City Hubs had a higher concentration of inmates from New York City and Suburban New York City counties.

Country of Birth

Eighty-nine percent (88.6%) of under custody inmates were born in the United States or a United States Territory, including American Samoa, Panama Canal Zone, Guam, U.S. Virgin Islands and Puerto Rico (see Table 5A). Approximately eleven percent (11.3%, N = 7,081) of the under custody inmates were born in a foreign country. Most of the inmates born in a foreign country were from one of the island nations in the Caribbean basin (N = 3,992 or 6.4% of under custody inmates).¹

Foreign birth may have implications for programming decisions due to differences in culture or language (many inmates from the Caribbean, South America, or Central America are Spanish language dominant). The percent of foreign-born inmates ranged from 7.9% in the Elmira Hub to 16.4% in the Sullivan Hub (see Figure 5A and Table 5B).

Figure 5.
Foreign Born Inmates Under Custody

1. For additional information on foreign born inmates see "The Impact of Foreign-Born Inmates on the New York State Department of Correctional Services" (May, 2006), New York State Department of Correctional Services, Albany, New York 12226.

Marital Status

About one-fifth (20.5%) of under custody inmates were legally married at the time of commitment. Another 3.7% were living in a common law arrangement at the time of their commitment. The majority were single, never married (64.9%); the balance were separated/divorced (8.9%) or widowed (1.0%) (see Table 6).

The distribution of single, never married inmates ranged from 56.5% in the Sullivan Hub to 75.5% in the Great Meadow Hub. The Great Meadow Hub had the highest proportion of young inmates (see Figure 6).

Number of Living Children

The majority of inmates under custody (59.2%) report at least one living child (see Table 7 and Figure 7). Approximately 11% of under custody inmates reported four or more living children. The percentage of inmates with at least one child varied considerably from 46.8% in the Great Meadow Hub to 64.2% in the Watertown Hub. The Great Meadow Hub, with the highest concentration of young offenders, had the lowest percentage of inmates with children.

Religious Affiliation

Eighty-seven percent (86.7%) of under custody inmates claimed affiliation with a recognized religion. Almost fifty-eight percent (57.9%) belonged to a Christian faith. Fourteen percent (13.8%) affiliated with an Islamic faith and fourteen percent (13.9%) with other religions (see Table 8). Fourteen percent (14.3%) either did not claim affiliation with a religion or did not provide information about religious affiliation.²

In recent years, the percentage of the inmate population identifying as Catholic has been decreasing while those identifying as Protestant has been increasing. Due to this trend, in 2003 as reported in the January 1, 2003 Hub Report, inmates identified as Protestant became the largest religious group passing inmates identified as Roman Catholic. The variation across Hubs for Catholic inmates was from 21.2% in the Elmira Hub to 32.0% in the Watertown Hub (see Figure 8). The Watertown Hub had the lowest proportion of inmates identified as Protestant (26.8%) and the Wende Hub had the highest percent (34.1%). For Islamic inmates the low was 11.3% in the Wende Hub to 17.5% in the New York City Hub.

Figure 8.
Religious Affiliation

² For additional information on this topic see Religious Affiliation of Under Custody Population (2003) New York State Department of Correctional Services. Albany, New York 12226

Veteran Status

Veterans under custody are eligible for various benefits from the U.S. Veterans Administration and as a result the Department tracks the number of veterans in its custody. The Department operates programs for veterans of military service at several facilities.

Of the 62,732 inmates under custody on January 1, 2006, 3,517 (5.7%) were veterans of the armed forces. Of the veterans, 2,227 were post-Vietnam War-era veterans and 953 were Vietnam War-era veterans; an additional 187 served prior to Vietnam and for 150 veterans the era of service was unknown (see Table 9). Figure 9 shows the proportion of veterans in each Hub. The distribution of inmates who were veterans ranged from a low of 2.4% in the Watertown Hub to a high of 7.5% in the Oneida and Wende Hubs.

Section Two

CRIMINAL HISTORY

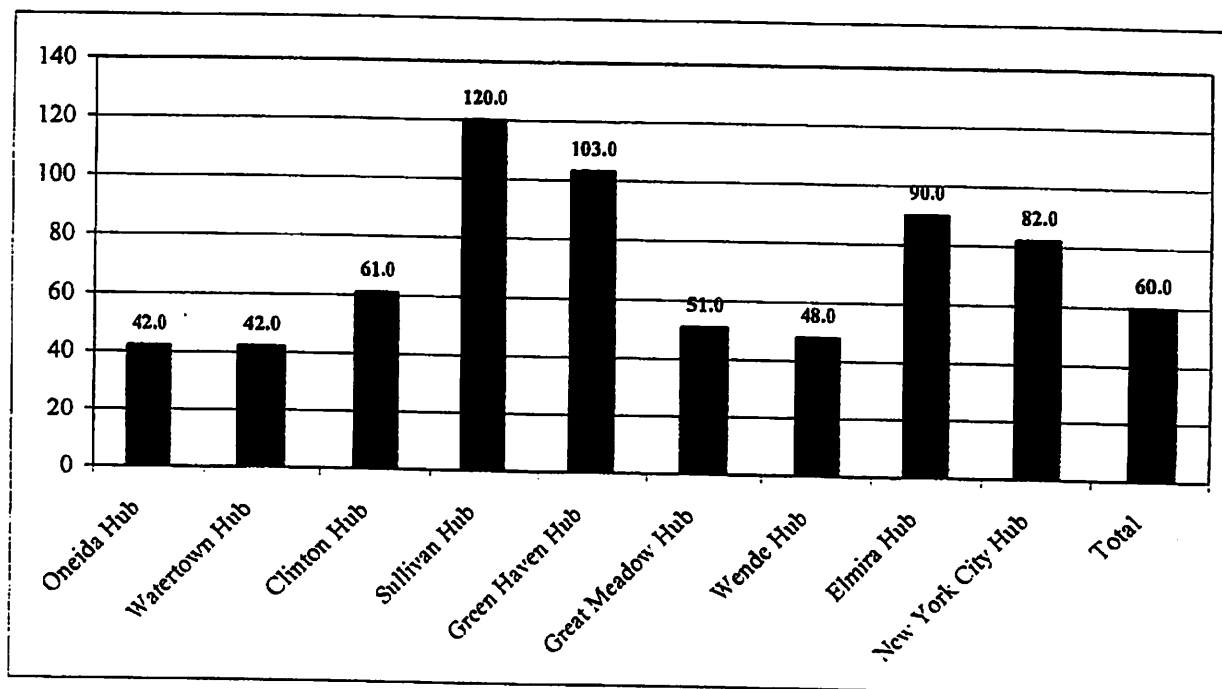

Minimum Sentence

The median minimum sentence of under custody inmates was 60.0 months³. However, the average minimum sentence length was 106.2 months (almost nine years), reflecting the influence of lengthy minimum sentences received by many inmates. Table 10B shows the average and median minimum sentence by facility security level.

There were differences between Hubs in average and median minimum sentence length (see Table 10B and Figure 10), but these differences were partially driven by the number of maximum-security facilities in each Hub. Inmates with long sentences are more likely to be confined in maximum-security facilities. Hubs where the ratio of maximum-security inmates to all other inmates is high tend to have a higher proportion of inmates with lengthy minimum terms. Median minimum sentence length ranged from 42 months in the Watertown and Oneida Hubs to a high of 120 months in the Sullivan Hub.

The median minimum sentence for persons in maximum-security facilities was 144 months; for those in medium security facilities it was 48 months (see Table 10D). For inmates in minimum-security facilities the median minimum term was 28 months. Table 10C shows the distribution of minimum sentence by facility security level. As of January 1, 2006, there were 161 inmates under custody who were serving sentences of "Life Without Parole" and 1 inmate serving a death penalty sentence (see Table 10A).

Figure 10.
Median Minimum Sentence (in months) by Hub

³ The median is a measure of central tendency which represents the value of the middle case (i.e. the case or cases at the 50th percentile) in the distribution of cases. The median is less subject to the influence of extreme values than is the arithmetic average and is preferred by some users for this reason.

Commitment Crime

Fifty-seven percent of inmates under custody on January 1, 2006 had been convicted of violent felony crimes (see Table 11A). Another 7% were convicted of other coercive offenses, 23% were convicted of drug offenses, and 11% for property and other crime. There were 807 inmates (1.3%) under custody who had been sentenced as a Youthful Offender, and 232 (0.4%) who were sentenced as a Juvenile Offender.

The proportion who were violent felony offenders in each hub varied from 41.3% in the Watertown Hub to 75.0% in the Sullivan Hub.

Nearly a quarter (22.7%) of under custody inmates were committed for drug offenses; 17.5% for robbery (total of Robbery 1st, Robbery 2nd, and Robbery 3rd, see Table 11B) and 11.9% for murder (see Table 11B). Many inmates were committed for multiple crimes. For those offenders with more than one commitment crime, the crime with the longest maximum term is the crime reflected in Table 11B.

Variation in the percent of drug offenders housed at each Hub was considerable; the percents ranged from 15.0% in the Sullivan Hub to 36.9% in the Watertown Hub (see Table 11A).

Second Felony Offender Status

About four of every nine inmates (44.7%) under custody on January 1, 2006 were sentenced as second felony offenders (see Table 12). Slightly over half (51.3%) were first felony offenders and four percent (4.0%) were sentenced as persistent felony offenders. The percent of inmates sentenced as second felony offender ranged from 34.3% in the Great Meadow Hub to 59.6% in the Watertown Hub (see Figure 12).

Prior Adult Criminal Record

Inmates are placed in a prior adult criminal record category based on their most extensive penetration into the criminal justice system prior to their current incarceration. Thirty-five percent (35.1%) of under custody inmates had served a prior prison term (see Table 13). For 23.7%, prior jail was the most serious contact with the criminal justice system. Nineteen percent (19.2%) had a prior adult criminal conviction which did not result in jail or prison incarceration, while 7.4% had no prior conviction and 14.6% had no prior arrest.

The percent of inmates with a prior prison term varied from 26.9% in the Great Meadow Hub to 41.3% in the Clinton Hub (see Figure 13). The percent of inmates with no prior arrest ranged from 10.2% in the Watertown Hub to 20.3% in the Green Haven Hub.

Length of Time Served at Current Holding Facility

The average length of time served at the current facility was 16.6 months and the median was 8.0 months (see Table 14B). Average time served at current facility ranged from 11.3 months in the Oneida Hub to 26.7 months in the Green Haven Hub. The median time at current holding facility ranged from 6.3 months in the New York City Hub to 12.0 months in the Sullivan Hub (see figure 14). Information on length of time served at current holding facility is useful to facility staff when planning inmate program assignments. Staff use this information to help design assignments that minimize the risk of disruption to the inmate's program plan due to transfer or release.

Length of Time in Department Custody

Inmates held under custody on January 1, 2006, spent on average 53.5 months in DOCS since their latest admission date (see Table 15B). The median length of time was 25.8 months. Table 15A shows that 15,624 (24.9%) offenders had spent 72 months or more under custody as of January 1, 2006 and 5,829 (9.3%) offenders had spent less than 3 months under custody as of that date. Inmates in the Sullivan Hub had served the longest since their last admission date (median 74.2 months) and Watertown Hub had the lowest median time served (17.1 months)(see figure 15).

The 15,624 inmates who have been held under custody for 72 months or more is a general indicator of the current "long term" population who were held in New York State correctional facilities on January 1, 2006. Long term inmates may require a somewhat different sequence (or mix) of education, vocational training, and work assignments than would be true for other inmates with comparatively shorter sentences.

Time to Earliest Release Eligibility

Time to earliest release date is a measure of the length of time until the earliest possible date at which the inmate can be legally released. Inmates are not necessarily released on this date. The Board of Parole may require the inmate to remain in prison beyond the earliest legal release date or the inmate may lose good time due to poor discipline or poor program participation, and thus remain in prison longer.

Table 16B shows that the "average time to earliest release" for the total under custody population on January 1, 2006 was 48.6 months, and the "median time to earliest release" was 16.8 months.

The range of median time to serve until earliest release date varied considerably across the Hubs. In the Watertown Hub, the median time to earliest release was just 11.9 months. However, in the Green Haven Hub it was 30.0 months (see Figure 16). Figures on average time to earliest release showed even wider variation: 15.9 months in the Watertown Hub and 72.2 months in the Green Haven Hub (see Table 16B).

Section Three

PROGRAM RELEVANT CHARACTERISTICS

Reading Proficiency

The Department's education program objective is to encourage every inmate to pass a high school equivalency General Education Diploma (GED) test while incarcerated. Testing and education programming are used by the Department to track the academic level of inmates in reading and mathematics. In order to take the GED examination, the Department requires inmates to take tests demonstrating at least a ninth grade level in reading and mathematics. Directive 4804 detailing Departmental educational policy was revised on April 28, 2003. It increased the reading level requirements for the GED exam from 8th grade to 9th grade. This directive requires most inmates to be placed in educational programming until reading levels are tested at the 9th grade level. Effective January 1, 2005, a policy statement was issued by Deputy Commissioner John H. Nuttall mandating GED preparation for all inmates.

For this report, data on reading proficiency and academic degree status were taken from a data file compiled on January 14, 2006. The number of cases on these educational tables (N=62,731) is almost the same as for earlier tables (e.g. 62,732 in Table 1). The data are presented for total inmates for all examinations (Table 17A), English language examinations (Table 17B) and Spanish language examinations (Table 17C). Inmates with reading levels in the 0 – 5th grade range require adult basic education (ABE) courses. Inmates in the 6 – 8th grade range require course work to improve their test scores before being eligible for the GED examinations. Inmates in the 9 – 12th grade category are eligible to take the GED examinations, so their course work helps them prepare for the GED exam. Inmates must score ninth grade level or above in both reading and math before being eligible to take the GED exam.

Table 17A shows the reading level test results for all inmates. Of the 62,731 inmates under custody on January 14, 2006, 32,215 (51.4%) had a verified GED, high school diploma or higher degree, and 29,340 (46.7%) were without academic degrees. Not eligible to take a GED exam were 12,556 inmates (20.0%) whose reading ability was below the sixth grade level, and an additional 9,062 inmates (14.4%) whose reading ability was between the 6th grade and 8th grade level. These inmates require additional services in order to qualify to take a GED exam.

The percent of inmates in each Hub whose reading ability level was eighth grade or below is presented in Figure 17. Sullivan Hub had the lowest percent of inmates reading below the ninth grade level (25.3%). Watertown Hub had the highest percent of inmates reading below the ninth grade level (39.5%).

Table 17B shows the reading level test results for inmates taking English reading tests. This group of inmates was comprised of those with their highest test score on the English reading test, those with no preference for Spanish or other languages and no language preference recorded. Of these inmates, 31,032 (53.3%) had a verified GED, high school diploma, or higher degree. Of the remaining 27,237 inmates, 7,222 can read at the ninth grade level or above and are eligible to take a GED examination. There were 18,898 inmates reading below the ninth grade level and required to take additional education courses to be eligible for the GED examination. English reading level results ranged from 23.6% reading below ninth grade level at the Sullivan Hub to 36.1% at the Great Meadow Hub.

Table 17C shows the reading level for the Spanish language dominant inmates under custody on January 14, 2006. Of the 4,462 Spanish language dominant inmates, 1,183 (26.5%) had a verified diploma from a high school or a degree beyond the high school level. Of the remaining 3,279 inmates, 500 could read in Spanish at a ninth grade level or above, and according to Departmental policy, were eligible to take a Spanish language GED test. Table 17C shows that there were 2,720 Spanish dominant inmates who read below the ninth grade level and were required additional education services to qualify to take a GED exam. Spanish reading level results ranged from 42.8% reading below the ninth grade level at the Sullivan Hub to 70.0% in the Watertown Hub.

ONLY VERIFIED DATA ON EDUCATION REPORTED

Academic Degree Status

Table 18 presents data on the educational attainment of persons under custody on January 14, 2006. The data reveal that only 32,215 (51.4%) inmates had at least a high school diploma or General Education Diploma out of 62,731 under custody inmates. The Department only recognizes academic degrees that can be verified from an outside source or which are awarded while the inmate is in custody.

A comparison of the Hubs by percent of inmates with a GED, high school diploma or higher degree shows that the Sullivan Hub had the highest percent at 63.0% while the Great Meadow Hub had the lowest percent at 45.9%.

English Language Proficiency

The vast majority (91.4%) of inmates under custody are English language dominant (see Table 19). There were also 4,497 (7.2%) inmates who were Spanish language dominant (which includes Spanish dominant only, Spanish and limited English, and Spanish and moderate English). Spanish dominant inmates were present in significant numbers in several Hubs (see Figure 19). The Wende Hub in the western part of the state had 775 Spanish language dominant inmates while the fewest were at the New York City Hub with 327 Spanish dominant inmates. Spanish dominant inmates may require special programming and present special security problems because of their limited English comprehension.

Substance Abuse

As part of the reception process, the Department of Correctional Services attempts to identify inmates who use drugs and have problems with alcohol. Drug use in the six months prior to incarceration is determined by inmate self-report. Alcohol problems are assessed by use of the Michigan Alcoholism Screening Test (MAST). In 2002, the Department supplemented these indicators with the Simplified Screening Instrument (SSI). Scores of four or greater on the SSI indicate substance abuse. The specific type of substance is not identified by the SSI test.

The Department also supplements this information with data from the Inmate Payroll System and the Guidance System⁴. Table 20 shows that 72 percent of inmates abuse drugs, alcohol, or both as measured by available data from tests and self-reporting. Note that the information in Table 20 is based on a severity ranking. Inmates who abuse drugs and alcohol are placed in the appropriate drug category, while those using multiple drugs are placed in the most serious drug use category (e.g. crack/cocaine, narcotics).

There was variation across the Hubs in the percentage of inmates who have a known substance abuse problem (see Figure 20). For example, in the Watertown Hub, 78 percent are known to have abuse problems prior to incarceration compared to 65 percent at the Green Haven Hub.

Figure 20. Self-Reported Drug and Alcohol Use

⁴ For additional information on this topic see "Identified Substance Abusers - December 2005 (March 2006) New York State Department of Correctional Services, Albany, New York 12226.

Michigan Alcoholism Screening Test Score

Alcoholism is a serious problem in the under custody population. As noted in the prior section, the Michigan Alcoholism Screening Test (MAST) is administered to inmates during the reception/classification process to assess the extent of alcoholism. For purposes of this report "alcoholic" is defined as a score of 9 or higher on the MAST. A score of between 5 and 8 on the MAST is defined as "suggestive alcoholism". Of the 56,946 inmates for whom test results were available 25.2% (N=14,358) were defined as alcoholic and another 14.4% (N=8,212) were possibly alcoholic (see Table 21).

The Hubs varied in the percent alcoholic or possibly alcoholic; the Sullivan Hub had 32% alcoholic or possibly alcoholic and the Wende Hub had 48% alcoholic or possibly alcoholic (see Figure 21).
