**THE HUB SYSTEM: PROFILE OF INMATES
UNDERCUSTODY ON JANUARY 1, 2000**

George E. Pataki
Governor

Glenn S. Goord
Commissioner

EXECUTIVE SUMMARY

In 1992, the New York State Department of Correctional Services reorganized the delivery of program services to the inmate population. One of the components of this plan is grouping the correctional facilities by geographical proximity into administrative regions. This report presents a profile of the inmate population within each region. This executive summary briefly describes the characteristics of the total undercustody population and then lists the range of values found across the nine administrative HUBs on a selected set of variables.

CHARACTERISTICS	CATEGORY	TOTAL UNDER CUSTODY	RANGE ACROSS HUBS	
			Low	High
Gender	Female	4.9%	0.0%	16.4%
Age	Average age	33.9 yrs	29.3 yrs	36.7 yrs
Race/ethnic status	White African American Hispanic	16.0% 51.0% 31.1%	11.3% 48.3% 27.2%	20.9% 53.5% 38.1%
Region	From NYC	65.5%	53.9%	80.8%
Birthplace	Foreign born	12.9%	7.5%	16.7%

THE HUB SYSTEM: PROFILE OF INMATE POPULATION UNDERCUSTODY ON JANUARY 1, 2000

INTRODUCTION

The New York State Department of Correctional Services reorganized the delivery of program services to the inmate population in 1992. One of the important components of this plan is grouping the correctional facilities by geographical proximity into administrative regions. These administrative regions, referred to as Hubs, are groups of neighboring facilities that share administrative, support and program services. Each Hub has a core or "HUB" facility at which inmates are received and from which inmate movement and other administrative service delivery functions are controlled.

Purpose of the Report

The sections of this report profile the inmate population in each Hub as well as the population at each of the correctional facilities within the Hub. These profiles contain information on demographic characteristics and on other variables. These data will acquaint staff at each Hub with the overall characteristics of inmates in the Hub population as well as with differences in the characteristics of the inmate population at each of the respective facilities in the Hub.

This information permits comparisons with the characteristics of the inmate population at the initiation of the Hub system.¹ The report serves as a profile of the undercustody population at the end of calendar year 1999.

In the tables and graphs presented in the report each Hub is identified by the administrative facility for that Hub. Staff often refer to each Hub by the administrative facility for that Hub. The Hub facility for each Hub (along with a short abbreviation used in graphic displays) is as follows: Oneida C.F., Oneida Hub (ONI); Watertown C.F., Watertown Hub (WAT); Clinton C.F., Clinton Hub (CLI); Sullivan C.F., Sullivan Hub (SUL); Green Haven C.F., Green Haven Hub (GH); Great Meadow C.F., Great Meadow Hub (GM); Wende C.F., Wende Hub (WEN); Elmira C.F., Elmira Hub (ELM); Queensboro C.F., Queensboro Hub (QNS). Appendix A presents a map showing the 9 regional Hubs and the correctional facilities within each.

¹ See earlier report entitled, "Hub System: Profile of Inmate Population Undercustody on January 1, 1992", New York State Department of Correctional Services, Albany, NY 12226.

Section One

DEMOGRAPHIC CHARACTERISTICS

Gender Distribution

There were 71,466 inmates under custody on January 1, 2000, of whom 67,958 (95.1%) were men and 3,508 (4.9%) were women (see Table 1).

Females are incarcerated in three of the nine Hubs. For these three, the percentage of a Hub's total population that consists of women ranges from 9.6% in the Wende Hub to 16.4% in the Green Haven Hub.

Age Distribution

Table 2 shows the age distribution by Hub. The largest cohort is inmates 30-34 years old (14,074, 19.7%). The second largest age cohort is inmates 35-39 years old (13,389, 18.7%).

Sixteen to eighteen year old inmates, for whom the State is responsible to providing schooling, constitute 1.3% (961) of the total undercustody population as of January 1, 2000. There are more than 100 such inmates in three of the nine Hubs. For programmatic purposes the Department has increased the concentration of younger inmates at selected facilities in the Great Meadow Hub (see Figure 2). The average and median age of inmates housed at each facility is presented in Table 2B.

Inmates, sixty or more years old, constitute 1.3% ($N=946$) of the 71,466 inmates undercustody. The Oneida, Clinton, Sullivan, Green Haven, and Wende Hubs all have at least 100 such persons undercustody.

Race/Ethnic Distribution

Race/ethnic status of undercustody inmates is shown in Table 3. Approximately half (51.0%) of the inmates are African-Americans; about a third are Hispanic (31.1%); and the remainder are White (16.0%), or other ethnic groups (1.8%). There is some variability in the distribution of persons of each of the ethnic groups between Hubs (see Table 3). For example, the percent of Whites ranges from 10.3% in the Queensboro Hub to 20.9% in the Wende Hub. Among Hispanics, the range is from 27.2% in the Elmira Hub to 38.1% in the Queensboro Hub. Among African-Americans, the range is from 48.3% in the Oneida Hub to 53.5% in the Elmira Hub.

Region of Commitment

The majority of inmates are committed from New York City counties (65.5%). An additional 10.2% are committed from suburban New York, 13.9% from upstate counties with a population center containing 50,000 inhabitants or more, and 10.3% from the remaining upstate counties. There are differences across the Hubs in the proportion of inmates from each region of the state. Hubs in the western part of the state have a somewhat higher concentration of inmates committed from upstate urban and upstate rural counties (see Figure 4). Correspondingly, Hubs near the New York City area have a higher concentration of inmates from New York City or Suburban New York City counties. These differences are in part due to housing work release inmates at facilities near the residence county of the inmate.

Figure 4
Inmates Committed From New York City

Country of Birth

The large majority of inmates were born in the United States (78.2%) or one of its territories (8.6%) (see Table 5). Another 12.9% of the undercustody inmates were born in a foreign country. Among the 9,230 foreign born inmates, 5,846 (63.3%) were born in one of the island nations in the Caribbean basin.²

Foreign birth may have implications for programming decisions, due to differences in culture or language (many inmates from the Caribbean, South America, or Central America are Spanish dominant).

The percent of foreign born inmates ranges from 7.5% in the Queensboro Hub to 16.7% in the Watertown Hub (see Figure 5 and Table 5).

Figure 5
Foreign Born

² For additional information on foreign born inmates see "The Impact of Foreign-Born Inmates on the New York State Department of Correctional Services" (1999), New York State Department of Correctional Services, Albany, New York 12226.

Marital Status

Less than a fifth (19.1%) of undercustody inmates were legally married at the time of commitment. Another 6.1% were living in a common law arrangement at the time of their commitment. The majority were single, never married (65.0%) (see Figure 6); the balance were separated/divorced (8.2%); or widowed (0.9%) (see Table 6).

The distribution of single, never married inmates among Hubs ranges from 56.7% in the Sullivan Hub to 74.0% in the Great Meadow Hub, the Hub with the highest proportion of young inmates.

Number of Living Children

The majority of inmates under custody (58.9%) have at least one living child (see Table 7 and Figure 7). One inmate in ten reports four or more living children. The percentage of inmates with at least one child varies considerably from 46.5% in the Great Meadow Hub to 65.8% in the Queensboro Hub. The Great Meadow Hub, with the highest concentration of young offenders, has the lowest percentage of inmates with children.

Religious Affiliation

Almost ninety percent (88.5%) of undercustody inmates claim affiliation with a recognized religion. Over sixty percent (61.7%) belong to a Christian faith. Seventeen percent (16.5%) affiliate with the Islamic faith and 8.8% with other religions (see Table 8). Thirteen percent (13%) either did not claim affiliation with a religion or there is no information about them.³

Catholics are the single largest religious group at 32.1%. The variation across Hubs in Catholic inmates is from 29.0% in the Elmira Hub to 37.5% in the Queensboro Hub (see Figure 8).

Figure 8
Religious Affiliation

³ For additional information on religious affiliation of under custody inmates (e.g. age, sex, ethnic status by religious affiliation) see "Religious Affiliation of Undercustody Population", (1991), Division of Program Planning, Research and Evaluation, New York State Department of Correctional Services, Albany, New York 12226.

Veteran Status

Veterans under custody are eligible for various benefits⁴ and as a result the Department tracks the number of veterans in its custody.

The Department has veteran information on 70,837 inmates under custody, of whom 4,209 were veterans of the armed forces (5.9%). Of the veterans, 2,337 are post Vietnam War era-veterans and 1,309 are Vietnam War era-veterans; an additional 259 served prior to Vietnam and for 304 persons the era of service is unknown. Table 9 shows that, as a percent of the total population of inmates in each Hub, veterans are fairly evenly distributed across the 9 Hubs (see Figure 9). The low ranges from 4.4% veterans in the Great Meadow Hub to a high of 8.1% veterans in the Sullivan Hub.

Section Two

CRIMINAL HISTORY

Minimum Sentence

The median minimum sentence of undercustody inmates is 51.0 months. However, the average minimum sentence length is 87.2 months (over seven years), reflecting the influence of lengthy minimum sentences received by many inmates in the maximum security facilities (see Table 10 and Table 10B).

There are differences between Hubs in average and median minimum sentence length (see Figure 10), but these differences are partially driven by the number of maximum security facilities in each Hub. Inmates with long sentences are more likely to be confined in maximum security facilities. Appendix B shows average and median minimum sentence by security status. The median minimum sentence for persons in maximum security facilities is 108 months; and for those in medium security facilities, it is 42 months. For inmates in minimum security facilities the median minimum term is 36 months. Hubs where the ratio of maximum security inmates to all other inmates is high will tend to have a higher proportion of inmates with lengthy minimum terms. Median minimum sentence length ranges from 36 months in the Watertown and Queensboro Hubs to a high of 96 months in the Green Haven Hub.

Commitment Crime

Almost a third (31.2%) of undercustody inmates have been committed for drug offenses; 18.7% for robbery; and 9.4% for murder.

Variation in the percent of drug offenders housed at each Hub is considerable; the Hub percents range from 21.3% in the Sullivan Hub to 62.4% in the Queensboro Hub (see Table 11B). Similarly, the percent of inmates that are violent felony offenders ranges from 24.1% in the Queensboro Hub to 70.8% in the Sullivan Hub (see Figure 11 and Table 11B).

Second Felony Offender Status

More than half of the inmates undercustody on January 1, 2000 were second felony offenders (see Table 12) and 3.4% were persistent felony offenders. There is variation across the Hubs in the percent of second felony offenders undercustody (see Figure 12). The range is from 41.2% in the Great Meadow Hub to 66.2% in the Queensboro Hub.

Prior Adult Criminal Record

The data in Table 13 shows that a majority of the inmates under custody (59.1%) had either served a prior jail term (24.1%) or a prior prison term (35.0%). The groups used for this variable are mutually exclusive. Only the most serious prior contact with the criminal justice system is listed for each inmate. Twenty percent (20.1%) had a prior conviction without prior jail or prior prison. Eight percent (7.9%) had no prior conviction and thirteen percent (12.9%) had no prior arrest.

The percent of inmates with a prior prison term varies from 27.9% in the Great Meadow Hub to 40.2% in the Watertown Hub (see Figure 13).

Length of Time Served at Current Holding Facility

The average amount of time served at the current facility for the population undercustody was 14.4 months and the median was 6.9 months (see Table 14B). Comparing the Hubs, there is variation in the average time served at current facility and in the median time served at current facility. For example, among the Hubs, the range in average time served is 7.7 months in the Queensboro Hub to 22.9 months in the Green Haven Hub. The median time among Hubs ranges from 3.4 months in the Queensboro Hub to 11.6 months in the Sullivan Hub (see figure 14). Information on length of time served at current holding facility is useful to facility staff when planning inmate program assignments. Staff can use this information to help them design assignments that minimize the risk of disruption to the inmate's program plan due to transfer or release.

Length of Time in Department Custody to Date

Table 15B shows that the inmates on average had spent 42.4 months in DOCS custody as of January 1, 2000. The median length of time was 24.4 months. Table 15 shows that 12,989 (18.2%) had spent 72 months or more under custody as of January 1, 2000 and 9.9% (N=7,058) had spent less than 3 months under custody as of that date.

The 12,989 inmates under custody 72 months or more is a general indicator of the current "long termer" population in New York State correctional facilities. Long term inmates may require a somewhat different sequence (or mix) of education, vocational training and then work assignment than would be true for most other inmates with short sentences.

Figure 15 shows the variability in median time served in DOCS custody by Hub. Inmates in the Sullivan Hub have served the longest (median 57.8 months) which occurs in part because there are three maximum security institutions in this Hub (Eastern C.F., Shawangunk C.F., and Sullivan C.F.). The Watertown Hub with the lowest median time served (14.4 months) has no maximum security facilities.

Time to Earliest Release Eligibility

Time to earliest release date is a measure of the earliest possible date at which the inmate can be legally released. Inmates are not necessarily released on this date because the parole board may require the inmate to remain in prison beyond the earliest legal release date.

Table 16B shows that the "average time to earliest release" for the total undercustody population on January 1, 2000 was 40.2 months and the "median time to earliest release" was 14.9 months.

The range of median time to serve by Hub is considerable. In the Queensboro Hub, the median time to earliest release is just 7.2 months. However, in the Green Haven Hub it is 29.9 months (see Figure 16). Figures on average time to earliest release show even wider variation: 9.1 months in the Queensboro Hub and 69.7 months in the Green Haven Hub.

Section Three

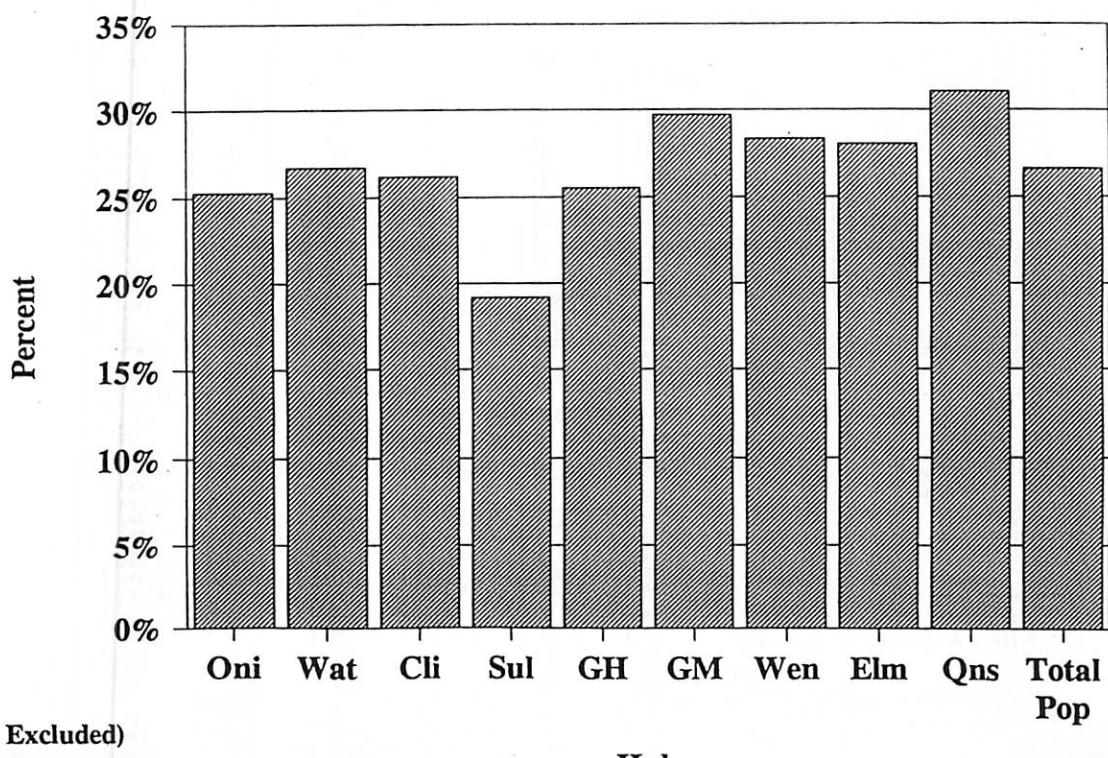

PROGRAM RELEVANT CHARACTERISTICS

Reading Proficiency

Among inmates undercustody on January 8, 2000, 30,629 English speaking inmates have a verified high school diploma (see Table 17). Data on reading proficiency, math proficiency, and academic degree status were taken from a data file compiled on January 8. The number of cases on these educational tables ($N=71,356$) is slightly different than that for earlier tables (e.g. 71,466 in Table 1).

Table 17B shows that there were 32,571 English dominant inmates undercustody who did not possess a high school diploma. Of that number 24.3% (7,904) were reading below the fifth grade level. An additional 11,076 (34%) were reading at less than the eighth grade level, a level required by the Department to take the examination for a high school equivalency diploma (G.E.D.).⁵ Thus, 58.3% of the inmates without a high school diploma needed educational services simply to help them read at the level necessary to earn a General Education Diploma.

ONLY VERIFIED DATA ON EDUCATION REPORTED

Table 17C shows the reading level for the Spanish dominant inmates under custody on January 8, 2000 (see also Figure 17B). Spanish dominant inmates with verified diplomas from high school or degrees beyond the high school diploma level totaled 2,060 or 30.6%. Of the remaining 4,665 inmates, 919 can read in Spanish at an eighth grade level or above. Departmental policy requires that inmates in Department custody must be able to read on at least the eighth grade level in order to take the General Education Diploma (GED).⁶

Figure 17B
Spanish Reading Level: 7th Grade or Below

(Missing Test Data Excluded)

⁶ Department Directive # 4804.

ONLY VERIFIED DATA ON EDUCATION REPORTED

Academic Degree Status

Table 18 presents data on the educational attainment of persons under custody on January 8, 2000. The data reveal that only 32,689 (45.8%) of undercustody inmates had at least a high school diploma or equivalent out of 71,356 undercustody inmates. The Department only recognizes academic degrees that can be verified from outside sources.

ONLY VERIFIED DATA ON EDUCATION REPORTED

English Language Proficiency

The vast majority (89.8%) of inmates undercustody are English language dominant (see Table 19). There are also 6,757 inmates who are Spanish language dominant (9.5%). (The number of Spanish language dominant on January 1, 2000 (N=6,757) differs slightly from Spanish language dominant on January 8, 2000 (N=6,725) as reported in the section on reading proficiency.) Spanish dominant inmates are present in significant numbers in several Hubs (also see Figure 19). For instance, the Wende Hub in the western part of the state has 1,356 Spanish language dominant inmates; the Clinton Hub has 957 Spanish language dominant inmates; while the Oneida and Green Haven Hubs have nearly 900 Spanish language dominant inmates. These inmates may require special programming and present special security problems because of their limited English comprehension.

Michigan Alcoholism Screening Test Score

Alcoholism is a serious problem in the undercustody population. To assess the extent of alcoholism the Michigan Alcoholism Screening Test (MAST) is administered to inmates during the reception/classification process. Alcoholism for this report is defined as a score of 9 or higher on the Michigan Alcoholism Screening Test (MAST). A score of between 5 and 8 on the MAST is defined as "suggestive alcoholism". Of the 62,834 inmates for whom test results are available 26.2% (N=16,458) are defined as alcoholic and another 14.3% (N=9,004) are possibly alcoholic (see Table 20). The Hubs vary in the percent alcoholic or possibly alcoholic; the Clinton Hub has 32.2% alcoholic or possibly alcoholic and the Wende Hub has 49.9% alcoholic or possibly alcoholic. This high percent of alcoholic inmates in the Wende Hub is in part attributed to the Driving While Intoxicated Program at Gowanda C.F. As of January 1, 2000, there were 272 inmates at Gowanda C.F. serving a sentence for DWI (see Table 11).

Drug Use

Fifty-five percent (55%) of undercustody inmates admit to drug use prior to confinement on the instant offense (see Table 21). This includes 26.3% who admit to cocaine use (including crack or crystalline cocaine) either alone or in combination with other drugs. Other drugs used by a substantial number of inmates include substances containing cannabis (e.g. marijuana) and narcotics. Table 21 shows that many inmates are multiple drug users. The following ranking system has been used to assign multiple drug users to a category: (1) cocaine or crack, (2) hallucinogens, (3) narcotics, (4) cannabis, (5) other drugs. If a person uses cocaine and narcotics, cocaine use is counted. Similarly, if marijuana and narcotics are both used, narcotics is counted.

There appears to be variation among the Hubs in the percentage of persons denying drug use, admitting cocaine use, and admitting other drug use (see Figure 21). For example, in the Queensboro Hub, 36.9% of inmates admitted prior use of cocaine in some form whereas only 25.1% of inmates in the Great Meadow Hub claimed to have used it. Thirty percent (30.4%) of persons in the Queensboro Hub deny drug use compared to forty six percent of inmates in the Clinton Hub.

MAXIMUM SECURITY

MEDIUM SÉCURITÉ

MINIMUM SECURITY CAMPS

A map showing the boundaries of Clinton and Watertown Hubs. The Clinton Hub is located in Franklin County, with symbols for CHATEAU ROY ALTADIA, BAKER HILL, FRANKLIN, LTON INT'L, CLINTON, GABRELLS, and ADIRONDACK. The Watertown Hub is located in St. Lawrence County, with symbols for OGDENSBURG RIVERVIEW and GOVERNOR. The map also shows the St. Lawrence River and parts of Jefferson and Lewis counties.

LEGEND

- ▲ STATE HUB
- REGIONAL HUB
- COUNTY HUB
- ◆ COUNTY CENTER

This map illustrates the distribution of correctional facilities and related programs across New York State. It includes labels for maximum, medium, and minimum security facilities, as well as reception centers, work release, shock incarceration, and drug treatment campuses. The map also shows county boundaries and major cities.
